

The providers at Neurology Center of Nevada and staff are trained to diagnose and treat all Neurological conditions listed below. Our specialists also diagnose the causes of Neuropathy (tingling and numbness) and offer several treatments to overcome or reduce the severity of symptoms. We also focus on chronic migraine headaches as well as treatment of Obstructive Sleep Apnea: a seemingly benign problem that can have serious medical complications. Our physicians perform Occipital Nerve Block for headaches or occipital neuralgia. They also trained to perform Botox treatment for spasmodic torticollis, spasticity due to stroke & etc.

We treat:

ALS	Sleep Apnea
Narcolepsy	Gullian Barre Syndrome
Alzheimers Disease	Spinal Cord Injury
Neuropathy	Headache
Back Pain	Stroke/CVA
Night Terrors	Huntington's Disease
Bell's Palsy	Tics/Tourette's
Parkinsons	Insomnia
Carpal Tunnel	Vertigo
RLS	Migraine
Cerebral Palsy	Movement Disorders

NCN Sleep Center has a dedicated and experinced staff comprised of Customer Care Representatives, Certified Sleep Technicians and doctors Board Certified in Sleep to ensure patients receive the highest level of care. Patient studies are performed in a private, luxury setting using state of the art equipment. You can rely on NCN Sleep Centers to provide:

- Final patient report provided within 72 hours of diagnostic sleep study
- Board Certified Sleep Doctors and Certified Sleep Technologists
- Insurance authorization
- Convenient locations with easy freeway access
- Private bedrooms with 32' LCD Flat Panel TV with DVD player
- Spacious king sized Heavenly® Beds and spa inspired bathrooms

80 million Americans suffer from a sleep problem, and nearly 60 percent of them have a chronic sleep disorder.

At NCN Sleep Centers, our sole purpose is to assist patients who may be needlessly suffering from obstructive sleep apnea. A disease where 90% of those affected live undiagnosed and untreated.

NCN works closely with doctors, nurses and physicians assistants to assure patients get the help they need for optimal health. We provide a comprehensive clinical approach through our devoted team of highly skilled sleep physicians, respiratory technicians and support staff. The NCN model includes current and relevant OSA education, enhanced patient access and customer service to ensure a gold standard of care for your valued patients.
